Commands for managing firewall service and policies 1

Commands for managing firewall service and policies

You can use the `system services firewall` commands to manage firewall service, the `system services firewall policy` commands to manage firewall policies, and the `network interface modify` command to manage firewall settings for LIFs.

If you want to...	Use this command...
Enable or disable firewall service	<code>system services firewall modify</code>
Display the current configuration for firewall service	<code>system services firewall show</code>
Create a firewall policy or add a service to an existing firewall policy	<code>system services firewall policy create</code>
Apply a firewall policy to a LIF	<code>network interface modify -lif lifname - firewall-policy</code>
Modify the IP addresses and netmasks associated with a firewall policy	<code>system services firewall policy modify</code>
Display information about firewall policies	<code>system services firewall policy show</code>
Create a new firewall policy that is an exact copy of an existing policy	<code>system services firewall policy clone</code>
Delete a firewall policy that is not used by a LIF	<code>system services firewall policy delete</code>

For more information, see the man pages for the `system services firewall`, `system services firewall policy`, and `network interface modify` commands.
