Additional restrictions and limitations ..... 1

# Additional restrictions and limitations

There are several additional restrictions and limitations when using the SnapMirror Business Continuity solution.

## Consistency groups

The maximum number of SnapMirror Synchronous Consistency Group relationships in a cluster is five, a limit which is platform-independent. If you reach or attempt to exceed this limit, the following message is displayed:

The number of SnapMirror Synchronous Consistency Group relationships in a cluster cannot exceed 5

## Volumes per consistency group

The maximum number of volumes supported per SnapMirror Synchronous Consistency Group relationship is twelve, a limit which is platform-independent. If you reach or attempt to exceed this limit, the following message is displayed:

The number of volumes in a SnapMirror Synchronous Consistency Group cannot exceed 12

## Volumes

The maximum endpoints per platform are included in the following table.

S. No	Platform	Endpoints per HA for SM-BC	Overall sync and SM-BC endpoints per HA
1	AFF	60	80
2	ASA	60	80

## SAN object limits

The following SAN object limits are included in the following table and apply regardless of the platform.

Limits of objects in an SM-BC relationship	Count
LUNs per volume	256
LUN maps per node	2048
LUN maps per cluster	4096

Limits of objects in an SM-BC relationship	Count
LIFs per VServer (with at least one volume in an SM-BC relationship)	256
Inter-cluster LIFs per node	4
Inter-cluster LIFs per cluster	8
