Update firmware..... 1

Update firmware

You can apply a firmware updated to supported devices in your cluster, such as disks, disk shelves, the Disk Qualification Package (DQP) the service processor (SP), or the Baseboard Management Controller (BMC).

Steps

1. Copy the needed firmware update files from the NetApp support site.

You can copy the files to an HTTP or FTP server on your network or to a local folder.

2. In ONTAP System Manager, click **Cluster > Overview**.
3. In the right corner of the Overview pane, click  and select **ONTAP Update**.
4. Click **Firmware Update**, select **From Server** or **Local Client** and provide the server URL or the file location.

You can monitor or verify the update under **Firmware Update Summary**.
