Preparing to use the ONTAP CLI 1

Preparing to use the ONTAP CLI

You should be familiar with the following commands when deploying the SnapMirror Business Continuity solution using the ONTAP command line interface.

SM-BC does not support the `snapmirror quiesce` and `snapmirror resume` commands for relationships with active sync policy.

For more information about the following ONTAP commands, see [NetApp Documentation: ONTAP 9](#).

| Command | Description |
|------------------------------------|---|
| <code>lun igroup create</code> | Create an igroup on a cluster |
| <code>lun map</code> | Map a LUN to an igroup |
| <code>lun show</code> | Display a list of LUNs |
| <code>snapmirror create</code> | Create a new SnapMirror relationship |
| <code>snapmirror initialize</code> | Initialize an SM-BC consistency group |
| <code>snapmirror update</code> | Initiates a common snapshot creation operation |
| <code>snapmirror show</code> | Display a list of SnapMirror relationships |
| <code>snapmirror failover</code> | Start a planned failover operation |
| <code>snapmirror resync</code> | Start a resynchronization operation |
| <code>snapmirror delete</code> | Delete a SnapMirror relationship |
| <code>snapmirror release</code> | Remove source information for a SnapMirror relationship |
