Display QoS marking values ..... 1

## Display QoS marking values

You can display the QoS marking values for different protocols, for each IPspace.

## Step

Display QoS marking values by using the `network qos-marking show` command.

The following command displays the QoS marking for all protocols in the default IPspace:

```
network qos-marking show -ip space Default
IPspace                Protocol                DSCP    Enabled?
-----
Default
CIFS                    10      false
FTP                     48      false
HTTP-admin              48      false
HTTP-filesrv            10      false
NDMP                    10      false
NFS                     10      true
SNMP                    48      false
SSH                     48      false
SnapMirror              10      false
Telnet                  48      false
iSCSI                   10      false
11 entries were displayed.
```
